

What is React?

JavaScript library used to create websites

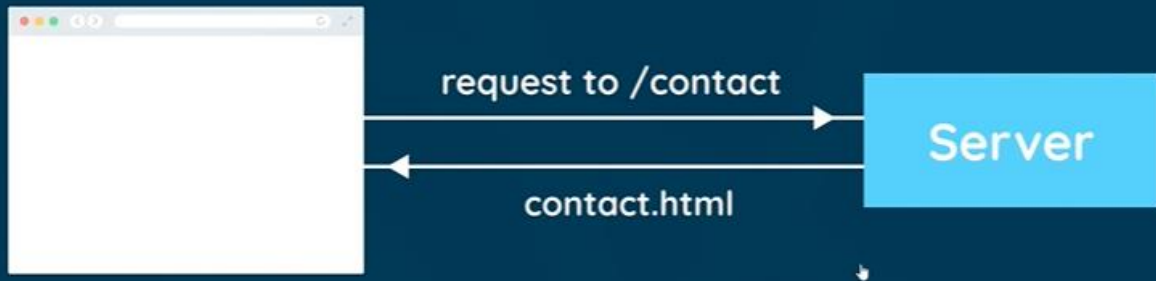

Allows us to easily create **Single Page Apps**
- **SPA's** for short

Single Page Applications

Single Page Applications

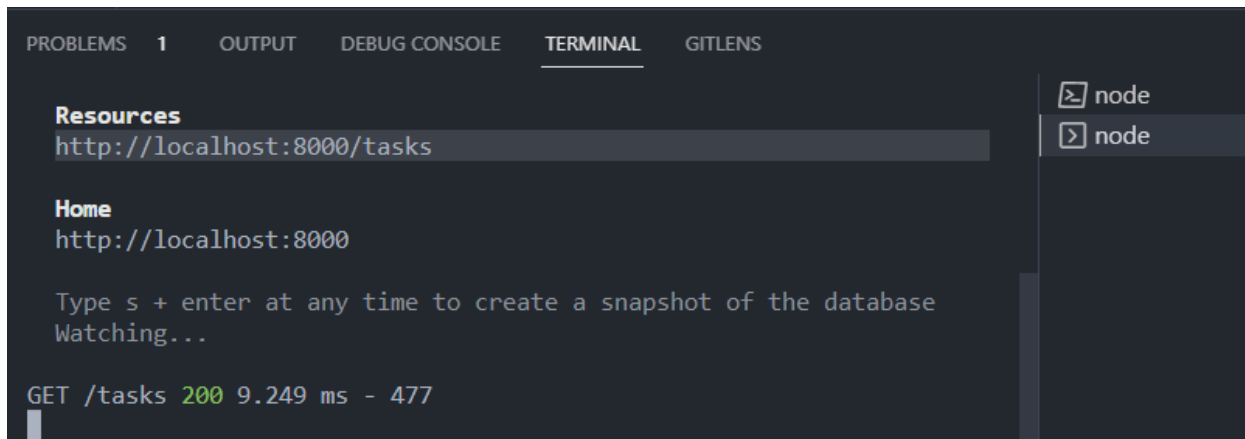

```
npx create-react-app basics-of-react
```

```
> cd basics-of-react
basics-of-react> npm start
```

PROBLEMS 1 OUTPUT DEBUG CONSOLE TERMINAL GITLENS

```
PS C:\Users\Soumodip Das\Desktop\my Doc\BasicsOfReact> npx json-server --watch data/db.json --port 8000
```

End Points

/tasks	GET	Fetch all tasks
/tasks/{id}	GET	Fetch a single task
/tasks	GET	Add a new task
/tasks/{id}	GET	Delete a blog
